## PROJECT EXPERIENCE

### Atlas — Web app

- Atlas is a web app that lets users add a marker and view markers for a geographic area. Imagine taking a walk in your neighborhood with a personal tour guide.
- Used forms and Google Map API to easily add/update a marker's location, name, description, and image attributes in a database.
- Simplified querying of Markers for a geographic area by using PostGis, a Postgres extension, to natively handle GIS data.
- Granted logged in users access to content through session cookies.
- Created secure passwords with Bcrypt's password hashing and salts.
- Delivered a MVP in 8 weeks, using Trello boards with agile practices.

## WORK EXPERIENCE

### Teaching Leadership Fellow — LaunchCode, St. Louis, MO

September 2020 – Present

- Use Slack and Zoom to coordinate with a team to provide timely assistance to students and manage biweekly classroom time.
- Answer student questions in a way that lets them own their knowledge.
- Pair program to communicate new concepts and check understanding which creates a comfortable environment for asking questions and learning.
- Evaluate student work for errors and provide feedback/guidance to lead them to solutions.

### Bicycle Mechanic — The Hub Bicycle Company, Webster Groves, MO

January 2011 – Present

- Strengthened the service department reputation by efficiently adjusting and repairing hundreds of bikes in a way that was beneficial to both customers and The Hub Bicycle Company.
- Increased rider's confidence through teaching repair classes that cover flat tire fixing, gear adjustment, and other basic maintenance.
- Established a safe riding culture for our weekly group rides through example and direct conversations with cyclists during rides.
